Daniel **James**

JUNIOR SOFTWARE DEVELOPER

Nottingham, UK

 07502073658 | danielcjamesdj@gmail.com | www.djames.io | Deehjay | dancjames

Profile

Motivated and eager Junior Full Stack Software Developer who's recently graduated from the award-winning Software Development bootcamp provided by Northcoders. Experienced in designing, testing, and building full stack applications using JavaScript and its popular frameworks. Currently seeking a junior development role at a company whose values and principles align with my own, and where I will be able to make positive contributions and flourish as a developer.

Skills

Languages	JavaScript, HTML5, CSS3
Front-end	React.js, Vue.js, Svelte, TailwindCSS
Back-end	Express.js, Node.js, MongoDB, PostgreSQL, REST
Tools	Git, Jest, Bash, TDD, Agile
Currently Learning	C#, .NET

Projects

House of Games

LIVE VIEW | GITHUB (BACKEND) | GITHUB (FRONTEND)

- A board game review site built as a solo full stack project during my time with Northcoders
- Fully integrated back-end built as a **REST** api with a multitude of endpoints and HTTP methods, using **Node.js**, **Express.js**, and **PostgreSQL**
- Front-end built using **React.js** with responsive styling
- Users are able to view reviews and sort/filter them, and if they log in, are able to like and comment on them, and post or delete their own reviews

Know It All

LIVE VIEW | GITHUB (BACKEND) | GITHUB (FRONTEND) | MORE INFO

- An addictive daily quiz app built as a group full stack project during my time with Northcoders
- We were challenged to use tech not covered on the course, and were required to spike and create an MVP for the project
- **Svelte** and **TailwindCSS** were used for the front-end, **MongoDB** and **Express.js** were used to build the back-end, and **Firebase** was used for user authentication
- Users are able to play once a day, and are given a score based on their time taken and correct answers. Users who sign up are able to access leaderboards and achievements
- We utilised agile methodologies throughout, including sprints and daily standups, and used Git branches and pull requests to review code

Experience

Northcoders *Remote*

TRAINEE JUNIOR SOFTWARE DEVELOPER *Oct. 2022 - Jan. 2023*

- Student of an award-winning full stack software development bootcamp, a 13-week intensive course
- Learned the core fundamentals of programming, including functional programming, object-oriented programming, execution contexts, asynchronous code, recursion, and scope/closure/hoisting
- Acquired knowledge on various back-end and front-end frameworks and libraries, including Node.js, Express.js, PSQL, and React.js
- Followed industry-standard best practices throughout, such as Git and GitHub, Test-Driven Development, paired programming, and agile

International Police Association *Nottingham, UK*

WEB ADMINISTRATOR *Jul. 2018 - Aug. 2022*

- Provided administrative support to members of the largest police friendship association, with more than 370,000 members across the world
- Collaborated with a third party in the design, launch, and expansion of a bespoke, modern website, which retained more than 100,000 users
- Managed social media accounts on Facebook, Twitter, and Instagram
- Utilised a CMS to update the website daily: adding news articles, events, publications, and more
